

Sl. No.	Test Case Name	Test Procedure	Condition to be tested	Expected Result	Actual Result
1	submit bug report	submit valid bug details	valid input	bug saved successfully	pass
2	upload pdf file	upload pdf	valid pdf	text extracted successfully	pass
3	upload DOCX file	upload DOCX	valid document	content extracted	pass
4	upload csv file	upload csv	valid csv	data parsed correctly	pass
5	generate embedding	submit bug	valid text	embedding generated	pass
6	similarity search	search existing bug	matching bug available	similar bugs returned	pass
7	duplicate detection	submit duplicate bug	similarity>90%	duplicate identified	pass
8	triage agent	analyze bug	valid bug report	severity classified	pass
9	log analysis agent	upload stack trace	valid java/python trace	failure point identified	pass
10	orchestrator	execute workflow	complete request	all agents executed	pass
11	severity prediction	submit a bug with high impact	bug severity needs to be classified	correct severity is predicted	severity predicted correctly
12	priority prediction	submit a critical bug	bug priority needs to be assigned	P1-P4 priority is assigned correctly	priority assigned correctly
13	module identification	submit a bug related to a specific module	affected module needs to be identified	correct module is identified	module identified correctly
14	log analysis agent	upload a log containing an error	error details need to be extracted	error message and failure details are extracted	details extracted correctly
15	root cause analysis	submit bug with relevant logs	root cause needs to be identified	probable root cause is generated	root cause generated correctly
16	dashboard display	submit a bug and view results	analysis results need to appear on dashboard	results are displayed correctly	results displayed correctly
17	analysis integration	execute complete analysis workflow	all milestone 3 components must work together	complete analysis is performed successfully	workflow completed successfully
18	defect pattern analytics	submit multiples defect records	recurring defect patterns need to be identified	defect patterns are displayed correctly	patterns displayed correctly
19	analytics dashboard	open analytics dashboard	defect statistics need to be displayed	correct statistics are shown	statistics displayed correctly
20	resolution verification	mark an analyzed bug as resolved	resolved bug must be verified before kb update	verification option is displayed and works	correctly verification completed successfully
21	knowledge base update	verify a resolved bug	new resolved bug needs to be addedd	bug is added to knowledge base	bug added successfully
22	FAISS similarity check	add a similar resolved bug	existing knowledge needs to be checked	similar bug is detected based on similarity	similarity check completed
23	FAISS update	add a new resolved bug	new knowledge needs to be indexed	new entry is created in FAISS	entry created successfully
24	knowledge statistics	open knowledge base statistics	current kb statistics need to be retrieved	correct statistics are displayed	statistics displayed correctly
25	end-to-end testing	submit a bug and complete the full workflow	complete system functionality needs validation	bug is analyzed resolved,and knowledge base is updated	complete workflow executed successfully
